

Complete feed for shrimp juveniles

FEATURES

MeM is a top quality nursery feed produced by an adapted micro-extrusion process followed by marumerization. This innovative technology ensures a full water stability of soluble and insoluble nutrients in the feed while avoiding the use of chemical binders. The product retains its palatability and nutritional quality in water for more than 12 hours.

BENEFITS

- Micro-cold extruded product.
- Marumerized product.
- Preventing denaturation of essential nutrients.
- Homogeneous and tiny particle size facilitates apprehension by shrimps.
- High stability in water.
- Lower leaching with a better preservation of water quality in the nursery tanks.
