

Omega Spawn S

Supplementary feed for shrimp broodstock

FEATURES

Omega Spawn S is a high quality supplementary maturation feed for shrimp breeders. This maturation diet is a replacement for fresh foods that are normally used in shrimp maturation, such as squid or polychaetes. Omega Spawn S will help reducing biosecurity risk by replacing fresh food.

BENEFITS

- Containing all necessary nutrients for broodstock.
- Preventing denaturation of essential nutrients.
- Highly attractive as it resembles fresh food.
- Quick and easy preparation: DIY concept.
- Convenient application.
- Easily formed in different shapes, such as worm shape.
