

WeaN PRIME

Complete feed for fish juveniles

FEATURES

WeaN PRIME is a top quality nursery feed produced by a unique innovative technology, an adapted micro-extrusion process followed by marumerization. WeaN is formulated with one blend of additives with multiple action which works on different physiological pathways, improving the immune-system of the juveniles and their resistance to pathogens.

WeaN PRIME improves fish growth performance and FCR when they are exposed to pathogens or stress conditions.

BENEFITS

- Micro cold-extruded feed.
- Feed for hatchery and nursery stage (from BW of 0,5 gr to fingerlings).
- Homogeneous and tiny particle size facilitates apprehension by fish.
- High stability in water and less leaching. Improved water quality.
- Improved digestibility of ingredients.
