

FEATURES

Spirulina is a blue-green microalgae (cyanobacteria) rich in essential amino-acids. Spirulina is a natural source of vitamin B, ideal for shrimp larval phases. The production process includes an irradiation step to ensure biosecurity.

BENEFITS

- High protein level.
- Easy to consume in the first life stages.
- Ready to use sparing labor at hatchery level.
- Small size (< 75 µm).
- Dry algae.

COMPOSITION

Nutrient	Unit	Value
Moisture	%	8.0
Crude Protein	%	60.0
Crude Fat	%	5.5
Ash	%	9.5
PUFAs	%	5.0

INGREDIENTS

100% Spirulina.

INSTRUCTIONS OF USE

Weight the feed according to the dosage and mix well with clean water, then spread all over the tank. Product based on natural ingredients. Variation in color is possible but does not affect the performance.

Parameter	Unit	Zoea	Mysis
Feed size	µm		< 75
Feeding rate	g / million		10 – 20
Feeding routine	times / day		4 – 6

**Adjust feed amounts according to local conditions. For more information, contact your local ADM Aquaculture expert.*

PACKAGING

0.5 kg Jars (10 jars per carton).

STORAGE CONDITIONS

Store in a dry and cool place (best at 4 °C, max. 20 °C).

Shelf life: 2 years.

ADM IS YOUR GLOBAL LEADER IN ANIMAL NUTRITION

We are dedicated to enabling sustainable growth. Growth that benefits our customers, the world's population and this planet on which we live. We are One ADM Team working across a unique vertically integrated portfolio, providing exceptional levels of customer service and experience as we work together to address the three main challenges that our customers face: health through nutrition, performance & quality, and sustainability.
